

Eliminate paperwork and save time with powerful AP automation software

Automate manual processes so you can focus on growing your business

The typical construction finance team spends hours every week digging through stacks of paperwork and tracking down approvals on invoices—especially for teams in the field. They also must perform extensive manual work re-entering data in multiple systems, tracking down missing invoices, and communicating with frustrated sub-contractors who are eager to get paid.

AcumatiScan enables you to automate your AP processes so that you can reduce data entry, and more efficiently manage documents and route invoices for approval.

AcumatiScan will automatically acquire invoices from a designated inbox then leverage OCR (Optical Character Recognition) to code the invoices for you. This enterprise AP workflow system is designed specifically for Acumatica and features AP routing and approval, full enterprise content management, and mobile approval of AP invoices.

Content management and approval routing are simple with AcumatiScan's user-friendly, browser-based interface that's designed specifically for construction and real estate processes. AcumatiScan offers customizable workflows with automation that will meet the unique requirements of your construction business and help eliminate paper.

Your finance team will be able to manage documents more easily and automate AP invoice processing with AcumatiScan while integrating fully with Acumatica Construction Edition.

With AcumatiScan, you'll maintain complete control and visibility for each project and all associated documents—from anywhere.

KEY BENEFITS

SAVE TIME

- Automatically acquire invoices from a designated inbox
- Leverage OCR to code invoices, touch-free
- Store notes and documents for easy access

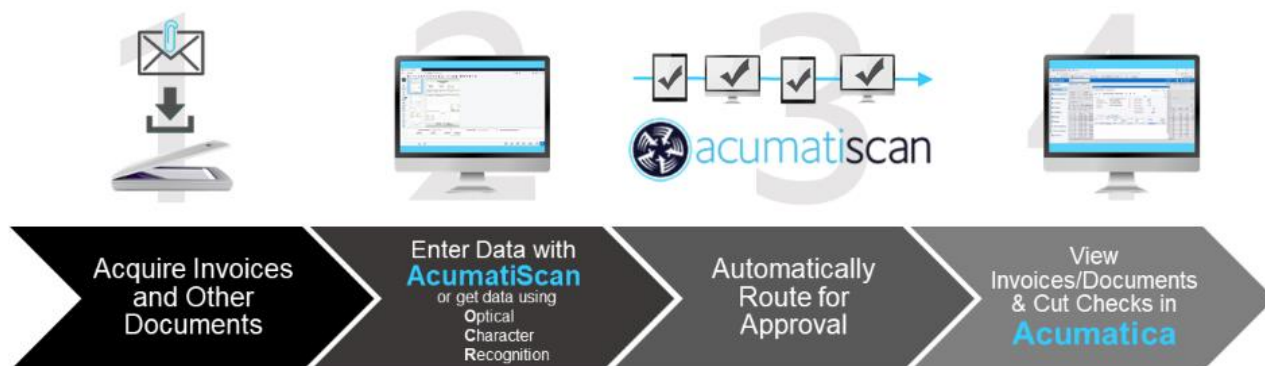

COMPLETE CONTROL

- Gain tighter control of document management
- Get a simple, real-time status view of invoices and documents

STREAMLINE WORKFLOWS

- Enjoy a single point of entry for data, with no need to rekey information
- Customized workflows, security, and more
- Automate AP invoice approvals with precision routing rules

Give your construction company an edge with Acumatica and AcumatiScan integration. You can automate your AP processes and streamline your workflows to run a more efficient construction business.

In providing this integration, Acumatica and Core Associates have teamed up to enable you to streamline your most time-intensive processes—so you can focus on growing your business and building your future.
