

## A seamless workflow, from estimating to project management *Anytime, anywhere you need it.*

In an industry where time is money and the competition are fierce, it pays to have a clear view of every construction project detail—from initial bid to final close-out. But with multiple teams, siloed processes, and limited access to data, information can be inaccurate or incomplete, compromising your ability to make the right business decisions.

A cloud-based, end-to-end estimating and construction accounting solution can put you in control of your construction projects from start to finish. Using Acumatica Construction Edition and ProEst together streamlines project workflow in a whole new way—accelerating estimate production, enhancing accounting visibility, and providing real-time data access that boosts your bottom line.

With Acumatica and ProEst integration, your people can connect and collaborate with ease. Multiple users can synchronize and share project data anytime, anywhere, and can work together wherever they are—in the office or in the field. That means even the smallest details in project reports, cost codes, supplier inputs, and customer data won't be missed or overlooked, and you can be sure your information is always accurate and up to date.

### KEY BENEFITS

#### SAVE TIME

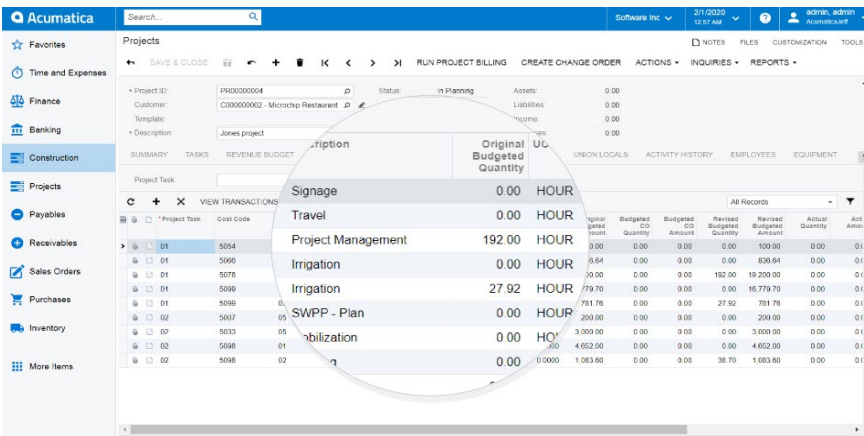

- Automate project setup in Acumatica just once, without the need to re-enter data.

#### ENABLE COLLABORATION

- Create complete project visibility for every team member, from initial estimate to the end of the project lifecycle.

#### ELIMINATE ERRORS
